

ICE-TAMP Test Matrix

Public Authentication

Test Case	Expected Outcome	Actual Outcome	Status	Known Defects
Load Login Page	Login page displays email, password, login button and registration link.	Login page loads correctly.	Pass	None
Login with Empty Fields	Validation messages are displayed for required fields.	Validation messages displayed.	Pass	None
Login with Invalid Credentials	User remains on login page and error message is displayed.	Error message displayed.	Pass	None
Login with Freight Owner Account	User is redirected to Freight Owner Dashboard.	User redirected successfully.	Pass	None
Login with Transporter Account	User is redirected to Transporter Dashboard.	User redirected successfully.	Pass	None
Login with Admin Account	User is redirected to Admin Dashboard.	User redirected successfully.	Pass	None
Register with Missing Fields	Required field validation messages appear.	Validation works correctly.	Pass	None
Register with Invalid Email	Invalid email message displayed.	Validation works correctly.	Pass	None
Register with Invalid Phone Number	Invalid phone number message displayed.	Validation works correctly.	Pass	None
Register with Password Mismatch	Password mismatch error displayed.	Validation works correctly.	Pass	None
Register New User	User account created successfully and redirected to login.	Registration successful.	Pass	None
Access Protected Route Without Login	User redirected to login page.	Redirect works correctly.	Pass	None
Access Protected Route with Incorrect Role	User redirected to their authorised dashboard.	Role protection functions correctly.	Pass	None

Freight Owner

Test Case	Expected Outcome	Actual Outcome	Status	Known Defects
Open Dashboard	Dashboard statistics and recent activities displayed.	Dashboard loaded correctly.	Pass	None
Create Load with Empty Fields	Validation messages displayed.	Validation successful.	Pass	None
Create Valid Load	Load saved and appears in My Loads.	Load created successfully.	Pass	None
View Loads	User's loads displayed.	Loads displayed correctly.	Pass	None
Edit Load	Updated information saved successfully.	Changes saved.	Pass	None
Delete Load	Load removed after confirmation.	Load deleted successfully.	Pass	None
View Load Requests	Incoming transporter requests displayed.	Requests displayed correctly.	Pass	None
Accept Load Request	Shipment created and request marked Accepted.	Request accepted successfully.	Pass	None
Reject Load Request	Request status changes to Rejected.	Request rejected successfully.	Pass	None
View Recommended Matches	Matching transporters displayed.	Matches displayed correctly.	Pass	Duplicate requests still possible.
Send Match Request	Match request created successfully.	Match request submitted.	Pass	Duplicate prevention not implemented.
View Shipments	Shipment list displayed.	Shipments displayed correctly.	Pass	None
Update Shipment Status	Shipment status updated successfully.	Status updated.	Pass	None
Confirm Delivery	Delivery confirmation saved.	Delivery confirmed successfully.	Pass	None
Track Shipment	Tracking timeline displayed correctly.	Tracking displayed.	Pass	None
Submit Rating	Rating saved successfully.	Rating submitted.	Pass	None

Transporter				
Test Case	Expected Outcome	Actual Outcome	Status	Known Defects
Open Dashboard	Dashboard loads successfully.	Dashboard displayed.	Pass	None
Register Truck	Truck saved successfully.	Truck registered.	Pass	None
Edit Truck	Updated truck details saved.	Truck updated successfully.	Pass	None
Delete Truck	Truck removed successfully.	Truck deleted.	Pass	None
Browse Available Loads	Available loads displayed.	Loads displayed correctly.	Pass	None
Request Load	Load request submitted successfully.	Request submitted.	Pass	Request button remains enabled until page refresh.
View Requests	Submitted requests displayed.	Requests displayed correctly.	Pass	None
View Assigned Shipments	Assigned shipments displayed.	Shipments displayed.	Pass	None
Submit Rating	Rating successfully saved.	Rating submitted.	Pass	Rating validation may incorrectly block second user.

Administrator

Test Case	Expected Outcome	Actual Outcome	Status	Known Defects
Open Dashboard	Dashboard statistics displayed.	Dashboard loaded successfully.	Pass	None
View Users	User table displayed.	Users displayed correctly.	Pass	None
Search Users	Matching users returned.	Search working correctly.	Pass	None
Suspend User	User status changes to Suspended.	Status updated successfully.	Pass	None
Activate User	User status changes to Active.	Status updated successfully.	Pass	None
Delete User	User removed successfully.	User deleted.	Pass	None
Verify User	Verification status updated.	Verification successful.	fail	Cant verify
Manage Disputes	Dispute status updated correctly.	Status updated successfully.	fail	Cant manage disputes
View Audit Logs	Audit records displayed.	Audit logs displayed.	Pass	None
Save Settings	Settings stored successfully.	Settings saved.	Pass	Settings are not enforced across the application.

Backend Services

Test Case	Expected Outcome	Actual Outcome	Status	Known Defects
Save User	User stored in local storage.	User saved successfully.	Pass	None
Login Session	Session created successfully.	Session stored.	Pass	None
Save Load	Load stored successfully.	Load saved.	Pass	None
Update Load	Load updated successfully.	Update successful.	Pass	None
Delete Load	Load removed successfully.	Deletion successful.	Pass	None
Save Truck	Truck stored successfully.	Truck saved.	Pass	None
Update Truck	Truck updated successfully.	Update successful.	Pass	None
Delete Truck	Truck deleted successfully.	Deletion successful.	Pass	None
Create Match	Match stored successfully.	Match created.	Pass	Duplicate matches allowed.
Create Shipment	Shipment stored successfully.	Shipment created.	Pass	None
Update Shipment	Shipment status updated.	Status updated.	Pass	None
Confirm Delivery	Delivery confirmation saved.	Confirmation successful.	Pass	None

Test Case	Expected Outcome	Actual Outcome	Status	Known Defects
Save Rating	Rating stored successfully.	Rating save	Pass	None
Create Dispute	Dispute stored successfully.	Dispute created.	fail	Cant create dsipute
Update Verification Status	Verification updated successfully.	Status updated.	fail	Cant verify

Known Defects

Defect ID	Description	Severity	Status
DEF-01	Duplicate match requests can be created because duplicate validation is not implemented.	Medium	Open
DEF-02	Transporter request button remains enabled after submitting a request until the page is refreshed.	Low	Open
DEF-03	Rating validation may prevent another authorised user from rating the same shipment.	Medium	Open
DEF-04	Admin settings (Allow Registration, Require Verification) are stored but not enforced throughout the application.	Medium	Open
DEF-05	Debug console.log() statements remain in production components.	Low	Open
DEF-06	Some pages do not refresh immediately after Local Storage updates, resulting in stale data until refresh.	Medium	Open
